

2022 SUBSIDENCE SURVEY REPORT

I. Survey Data:

During 2022, Twentymile's 7 East longwall did not directly undermine the Union Pacific railroad, Walcott, Hayden-Gore Pass and Western Area Power Administration (WAPA) power lines, or Foidel Creek.

II. Structures:

No structures were affected during the 2022 reporting period.

III. Map:

No locations were monitored during the 2022 reporting period.

IV. Conclusions:

Structures remained essentially unaffected during the 2022 reporting period. Twentymile will continue to monitor subsidence affects on the Union Pacific railroad, Walcott, Hayden-Gore Pass and Western Area Power Administration (WAPA) power lines, or Foidel Creek during undermining by future longwall panel centers.
