Hello,

I had a chance to talk to a CEMEX representative to gain more details on what is occurring with the off-site use of the CKD. According to CEMEX, it is only going for use as solidification media at the Waste Management Conservation Services Inc. Landfill at [41800 E 88th Ave, Bennett, CO 80102](#) and at the Clean Harbors Deer Trail Landfill at 108555 E U.S, Colorado 36, Deer Trail, CO 80105. Both landfills have CKD approved for use in solidification activities so I think if those are the only two instances of off-site use, then we should be fine.

However, please keep me posted if during the course of your inspections and interactions with CEMEX you come across other off-site uses, then there may be additional permitting requirements.

Thanks,

- Mike
