*Re: Trapper Mining Inc., Permit No. C-1981-010*

---

## **Technical Revision, TR-134, Response to Completeness Comments No. 2**

Dear Ms. Reilley:

Below is our response to your incomplete application letter of May 8, 2023 for Trapper's Technical Revision TR-134 application.

Trapper will not remove the areas as proposed in TR-134 with cultural concerns. Instead the cultural resources survey has been completed and is attached along with revised materials for the PAP.

These materials cover all applicable proposed stripping for TR-134 that had cultural concerns. These materials are also being submitted to comply with Stipulation 23 of PR-11 for the L and J Pit areas. Concerning the L-Pit area, no cultural resources were found as indicated in the attached report. Copies of the cultural surveys have also been submitted directly to Matthew Marques of Colorado SHPO for their review. Please direct any questions regarding approval and adequacy directly to them.

Revised permit materials include: Revised Appendix K Table of Contents, New Appendix K Sections XX and XXI containing the new applicable cultural surveys. Map M45 has also been revised and included to show the new survey areas.

Please get back to us with any questions, comments or concerns.

Sincerely,

A handwritten signature in cursive script, appearing to read "Graham Roberts", with a long horizontal flourish extending to the right.

Graham Roberts  
Environmental Supervisor  
Trapper Mining Inc.
