Hello Leigh,,

We are getting very close to having this completed, but need a few days to finish. We have our environmental team working on the sitemap to get the final touches. We have the new signs for the pit and delineation to mark around the boundary.

Would it be possible to extend another month or does that cause for concern?

Also, Jen our pit swamps environmentalist thought to maybe put together a google meet that we all could discuss how these other dump storage locations? Jen designed the main pit map back in 2012 and she is familiar with this area and what might need to be changed.

Thank you,

--
