GENERAL INSPECTION TOPICS

This list identifies the environmental and permit parameters inspected and gives a categorical evaluation of each. No problems or possible violations were noted during the inspection. The mine operation was found to be in full compliance with Mineral Rules and Regulations of the Colorado Mined Land Reclamation Board for the Extraction of Construction Materials and/or for Hard Rock, Metal and Designated Mining Operations. Any person engaged in any mining operation shall notify the office of any failure or imminent failure, as soon as reasonably practicable after such person has knowledge of such condition or of any impoundment, embankment, or slope that poses a reasonable potential for danger to any persons or property or to the environment; or any environmental protection facility designed to contain or control chemicals or waste which are acid or toxic-forming, as identified in the permit.

OBSERVATIONS

This was a joint inspection with the US Forest Service (USFS) and was conducted as part of the regular monitoring program. The Permittee, Ms. Amanda Adkins was present during the inspection. Ms. Cullen LaPointe and Josh Von Loh represented the USFS. The claim site is located in the SW1/4 of Section 12 near Cameron Cone south of Manitou Springs, east of Pike's Peak. An arrangement was made with a Crystal Park resident and Ms. Jean Cowman to access the site via Crystal Park from Manitou Springs. The Permittee actively worked the site during the inspection.

<u>Availability of Records:</u> Annual reports are current, having been filed through February 2023, stating the last mining activity was October 12, 2022. The previous inspection was on September 21, 2017. The approved postmine land use is forestry. There were no open infractions prior to the inspection. Both the surface and minerals are managed by the US Forest Service.

Backfilling and Grading: Sufficient backfill material appeared to be available.

Excess Spoil and Dev. Waste: Overburden piles were observed in the active mine areas (see **Photos 1** and **2**).

<u>Financial Warranty:</u> The \$5,900 bond held by the DRMS was last updated in 2015 and included one acre of reseeding. The reclamation cost was updated with current unit costs and added the bid preparation costs omitted in the 2015 estimate. The estimated reclamation cost increased about 2.5% to \$6,057 (see **Attachment A**). However, the current disturbance is on the order of a half an acre. As such, this currently held is adequate for the observed mine disturbance.

Fish and Wildlife: No impact to wildlife was observed.

Hydrologic Balance: No standing water was observed in the pit and no exposed groundwater was observed.

<u>Gen. Compliance with Mine Plan</u>: The operation appeared to be in compliance with the approved mine plan. The maximum allowed disturbed area for bonding purpose is one acre, although the site is permitted for 9.9 acres of affected area. Pits were estimated to vary between 3 and 4 feet deep.

<u>Off-site Damage</u>: The operation appeared to be confined to the permit boundary.

<u>Right of Entry:</u> Ms. Cullen indicated the last NOI required by the USFS and considered right of entry by the DRMS, was from 2018. Ms. Adkins stated she had sent in the USFS NOI renewal. <u>The DRMS will need</u> <u>confirmation of the NOI being submitted</u>.

<u>Reclamation Success</u>: Ms. Adkins indicated reclamation has been initiated on the Shrew Pocket (see **Photo 3**) and the Middle Pocket (see **Photo 1**). Both need additional backfill. No trash was observed.

<u>Revegetation:</u> Ms. Adkins stated she collects local seeds and hand broadcasts them in the reclaimed areas. Some grasses and forbs are becoming established. No noxious weeds were observed.

<u>Sediment Control</u>: No erosion problems were observed and no BMPs were needed at the time of the inspection.

<u>Signs and Markers:</u> The permit sign had been vandalized and removed (see **Photo 4**). Many of the claim signs had also been vandalized. A new claim center post sign was observed (see **Photo 5**). *The DRMS suggests adding*

the DRMS permit number to the claim markers as the metal signs are more durable. Alternatively, the DRMS permit number could be etched or painted on the claim center post.

<u>Permit Stipulations:</u> There are no permit stipulations.

Storm Water MGT Plan: Stormwater is controlled by berms and vegetation.

Topsoil: Topsoil stockpile has been stripped and stockpiled.

<u>Post Inspection Meeting</u>: Ms. Adkins agreed to confirm the NOI was current with the USFS and get new permit sign(s) posted.

Please contact Tim Cazier (303)328-5229 or email at <u>tim.cazier@state.co.us</u> if you have any questions regarding this report.
