Dear Patrick,

Goodmorning, I hope this email find you well.

Vineland, had a sever rain occurence last night. I was just driving by the pit this morning. Please see attach photos. In all the years, I have lived here, I have never seen erosion on the stock piles like this.  
Is this a safety concern? Are the stock piles to large? Are they now unstable?

Also, in a weed inspection about 2 yrs ago. The issue of " Tamerac" on the property was addressed. It appears just south of the entrance, is a stand of Tamarac. The pink tops are visible from the road.

Would you please address these topics as a formal complaint against the pit, for safety and environmental concerns.

Thank you for your time in this matter.

Wendi Kern  
Chairperson PCAOC
