

# **EXHIBIT M – OTHER PERMITS AND LICENSES**

Meeker Sand & Gravel: M-1976-038

The entire gravel pit area (existing and proposed expansion) were granted Special Use Permits by Rio Blanco County for gravel mining operations under Bob Dearman's ownership 1975. Board of County Commissioner (BOCC) minutes indicating this are included as Exhibit M-1. The post-mining uses (Industrial and Dry Rangeland) have also been approved.

A driveway permit with Rio Blanco county was secured previously and is on file with the owner/operator.

Current mine has a Stormwater Discharge Permit with the State of Colorado: #COG-501769. This permit will be ammended to include the proposed expansion area prior to affecting the land in the new area, although no discharge is expected nor will be allowed.

Current mine has APEN's for the stationary concrete batch plant (#13RB2399.XA) and for the mining operation (93RB261F / AIRS ID: 103-0060-002). No new APEN's will be required as the batch plant will remain on-site in current location and mining operation will simply be moving westward, with the same annual tonnages and production levels anticipated.

No radioactive source material license will be necessary.

No State Historical Preservation Office clearance will be necessary.

No disposal of dredge and fill material (404) permit will be necessary. No permits to construct a dam will be necessary.

No well permits, explosive permits or highway access permits will be necessary.

No US Forest Service or BLM permits will be necessary.

No other permits or licenses will be necessary.
