MINING & SAFETY-MINERALS

1780 E. 16th Ave, Denver, CO 80229  
Material's Location/Job Site (please print)

Granite Water  
Type of Material Disposing (please print)

Generator or Drilling Company guarantees that all material to be disposed of is both non-hazardous and non-harmful to soil and/or crops, etc. pursuant to all applicable Federal and State of Colorado Regulations. All material is "inert material" as defined as "non-water-soluble and non-putrescible solids together with such minor amounts and types of other materials, unless such materials are acid or toxic producing, as will not significantly affect the inert nature of such solids. The term includes, but is not limited to, earth, sand, gravel, rock, concrete which has been in a hardened state for at least sixty days, masonry, asphalt paving fragments, and other inert solids". In adverse weather, contact me first: tracking mud from the pit onto Highway 36 is not permitted by CDOT.
