

Legend:

- Completed and paved entry road
- Processing Area
- Current mining phase
- Fill for reclamation
- Screening berms
- Stored topsoil for reclamation
- Reclaimed area
- Dam
- Haul Road

Notes

1. Phase 1A will be used as the processing area during mining. This area will be surrounded by a visual protection berm throughout the mine life. See Visual Impact Analysis sheet VI.100 for more detailed information.

2. Two phases will be disturbed at a time, one being mined and the other being reclaimed. The maximum disturbance during most of the mine life will be approximately 10 acres. This does not include the 14.5 acres in the Phase 1A processing area.
