After review of the submission the Division has additional items that need to be addressed or clarified.

1. On the cover page it states "Surface locations were frozen, and as such were unsamplable." however there are surface water sample results contained in the report. Please clarify if the surface water sample locations were frozen or not.

Please respond within 30 days of the date on this letter. **The due date is August 25, 2023.** The Division reserves the right to further supplement this document with additional items and details as necessary.
