RE: Cooley Reservoir and Fulton Wildlife Area (M-1999-034)
Technical Revision 06 Request

Ms. Gagnon,

Holcim – WCR, Inc. is requesting a Technical Revision (06) in response to the November 10, 2021 letter addressed to Mr. Patrick Lennberg from Albert Frei and Sons referencing Aggregate Industries acreage reduction request. The following concerns will be addressed as follows:

- 1.) **Relocation of power lines back to original location:** Holcim has contracted with Xcel Energy to move the power lines back to their original location along 100th Avenue. Expected construction date is August-September 2023 weather depending.
- 2.) **Relocation of southwest sand berm:** Following the onsite meeting on August 1, 2023 with representatives present from Holcim, Albert Frei and Sons, and DRMS; the stockpile sand berm will be relocated north (onsite) to accommodate access for sloping any areas that are not currently 3:1 slopes along the southern perimeter boundary. The revised reclamation plan is attached.
- 3.) **Drainage Ditch Erosion Control:** Attached Exhibit A shows a typical design that Holcim will utilize to prevent further siltation into the adjacent Fulton Ditch. This design may vary based on field conditions.
- 4.) **Mowing and seeding:** Mowing and seeding on a 25 foot strip adjacent and immediately east of Bull Seep will occur in order to re-establish native vegetation.

Please contact me at 702-379-4623 with any questions and if you would like to have an in-person meeting.

Sincerely,

A handwritten signature in black ink, appearing to read 'Wyatt R. Webster', written over a horizontal line.
