Groundwater Monitoring Calculations - 2022 and 2023 - to Determine Compliance with Baseline Monitoring

DRMS Annual Report - Aug-2023

data from 2022 and 2023

Groundwater Monitoring Plan - notes from Adequacy Response #2 (August-2010)

- Determining Compliance From AR-2, "LGE proposes implementing corrective actions when groundwater levels at exterior monitoring holes [see #3] have dropped 5 feet or more from the monthly average drop [see #4] established during monitoring [see #2]."
- Monitoring Period - Baseline monitoring period is 2006-2010, pre-LGE operations for wells MW-01 to MW-14. Baseline monitoring period for MW-15, MW-16, Accord - is Jun-2017 to May-2019.
- Exterior Monitoring Wells - are on the edges of the site, or off-site, and are **BOLDED**. Exterior wells are MW-01, MW-03, MW-04, MW-05, MW-07, and new wells - MW-15, MW-16, and Accord (house well).
- Mon-to-Mon Average Change +/- (baseline) to incorporate both drops and increases (formerly called "monthly average drop")
 - Mon-to-Mon Average Changes +/- (baseline) were calculated by using the each relevant month-to-month change over each of the baseline years.
 - 5-feet - added to the Mon-to-Mon Average Changes +/- (baseline) to get the Mon-to-Mon Average Changes +/- with 5-feet added (baseline).

Determining Compliance with Groundwater Monitoring Plan

- Using current data, calculate the "Month-to-Month Change" in groundwater levels using monthly data for each well.
- Month-to-Month Changes that are (=) or (<) the "Mon-to-Mon Average Change +/- with 5-feet Added (baseline)" are in compliance. If the changes are greater, they are out of compliance and in red / shaded

DRMS Annual Report 2023 - Groundwater Monitoring Report & Well Map

We are submitting groundwater monitoring data and calculations covering this past year's reporting (2022 - 2023). Analysis of the data showed that groundwater levels have remained in compliance with the baseline ranges, determined by comparing the current data's mon-to-mon-changes against the baseline data's mon-to-mon average change +/- 5-feet, as noted above. Therefore, there are no compliance issues. Also, one interior well (MW-12) was mined out in Nov-2022.
