Leigh,

I am formally asking for an extension for the Technical Revision application for the **Dotsero Pit (M-1979-155)**. I am well aware that the previous deadline has passed and that time is of the essence for us to come into compliance.

For some background, I recently moved into my new position here in Grand Junction, (*formerly held by Jered Morgan*) where I perform many various duties in the Maintenance Section, one of which being the permitting and inspection contact for our pits. Within the transition to my new role some tasks were not given the priority they deserved; the TR application being one of those.

I am working closely with our ROW/Survey department to help get accurate maps that will show our permitted and actual disturbed areas so we can move forward. Unfortunately this is a time consuming process due to the enormity and number of people involved in the project. Which is why I am requesting the date of **October 9, 2023** to have the TR application submitted.

I thank you for your understanding and patience in this matter.

Best regards,

Lee DeGraffenried

LTC Ops I Structural Trades

Region 3 Section 2 Maintenance
