Dear Mr. Varra:

The Division received your response to a Compliance Problem cited in the Division's report from the inspection that was conducted on September 1, 2022. The status of the corrective action in regard to the cited problem is as follows:

**Compliance Problem, Noxious Weeds:**

Russian olive trees and tamarisk were seen at the mine site, and the operator needs to implement the weed control plan.

**This problem is considered to be resolved** as a result of information (description of work, map and photographs) sent via email on August 8 and August 9, 2023. It is clear that your company is implementing the weed control plan.
