**RE: Longmont Distel Operations - File No. M-1989-029,
Acreage Release Request Application (AR-2)
M1989029 Acreage Reduction 02 Request**

Dear Kevin Peart:

On August 10, 2023, the Division of Reclamation, Mining and Safety received your 112c Construction Materials Reclamation Permit Acreage Release Request application for the Longmont Distel Operations, which is located in Weld County. Preliminary review of the information received determined that the following additional information must be received before the Division can consider your application complete and technical review can begin. Thus, your application is incomplete for the purposes of filing as of August 10, 2023.

1. A revised cover letter which reflects a correction in acreage values for the total number of acres remaining at the site after AR2 and which reflects a correction in the number of acres which were incorrectly labeled as released under AR1 in 2018.

You have thirty (30) days from August 10, 2023 to submit all necessary documents that the Division needs for the application to be considered filed. If, at the end of the thirty day period, the application has not been determined to be complete and filed, the Division may deny the application and terminate the application file.

This letter shall not be construed to mean that there are no other technical deficiencies in your application. The Division will review your application to determine whether it is adequate to meet the requirements of the Act after submittal of all required items.

If you have any questions, please contact me at (720) 868-7757 or hunter.ridley@state.co.us.

Sincerely,
Hunter C. Ridley
