August 28, 2023

Hello Todd,

Upon reviewing the packet and the fees that you last week, we have decided not to request the use for the remaining 33.04 acres not be changed to industrial. Montezuma County will continue with our current mining plan.

Our agreement with the Town of Mancos states that we will return the property to them in 10 acres increments when mining has been completed on the acreage. At this time we feel like it will be several years before we complete another section and quite some time before mining is complete on this permit.

Montezuma County does not have any idea how the Town of Mancos will want to use this property when it is returned to them. With that being said, we feel like that it would be better to wait to change the zoning.

Please withdraw our previously submitted Request for Technical Revision.

Thanks,

Rob Englehart
Road Superintendent
Montezuma County
Road and Bridge Department
