**D Road Gravel Pit, Permit No. M-2002-046, Inspection Problem Abated**

Dear Mr. Gardner

On May 2, 2023 the Division of Reclamation, Mining and Safety (Division) conducted an inspection of the above referenced site. Mine Plan was cited as a problem for having more than the the maximum disturbance affected at one time. Corrective actions required you revise the Mine Plan to reflect the current operation by the corrective action date.

On September 7, 2023 the Division received and approved TR-3 which updated the Mining Plan. This satisfies the corrective action and it is considered abated.

If you require additional information, or have questions or concerns, please feel free to contact me.

Sincerely,

**Amy Yeldell**  
Environmental Protection Specialist
