Re: Bowie No. 1 East Mine Reclamation Clarification and Request  
Permit No. C-1981-038

Dear Mr. Bear:

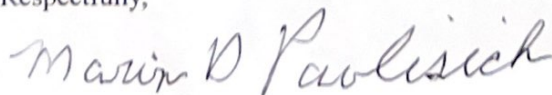

I am submitting this request on behalf of Pavlisick Mining Company ("PMC"), who holds the surface rights upon the lands which Bowie Resources, LLC ("BRL") has made application for a Phase III Bond Release for Mining and Reclamation Permit No. C-1981-038 with the Colorado Division of Reclamation, Mining and Safety ("DRMS"). During an onsite meeting on September 6, 2023 with DRMS and BRL, some questions arose as to whether or not to remove a small portion of fencing and water pipe previously associated with the operation of the mine. Based on visual observation and discussion with the parties present during the meeting, PMC hereby requests that these items be left as-is. These items do not pose any hazard to the land and would be best left in their current state.

PMC respectfully requests that no further reclamation work be completed on the above referenced items and that BRL's application for bond release be approved.

Furthermore, PMC intends to sell the property AS IS after bond release approval. Based on the collaborative discussion at the site visit concluding the requested resolution, PMC will not assume responsibility for the removal or alteration of the above cited items should a prospective buyer indicate dissatisfaction with the fencing or water pipe remaining in place.. It will be the new owner's discretion to resolve any concerns they may have regarding these items following transfer of ownership.

If you have any questions, please feel free to contact me.

Respectfully,

Marvin D. Pavlisick
