

COLORADO DIVISION OF RECLAMATION, MINING AND SAFETY

1313 Sherman Street, Room 215, Denver, Colorado 80203 ph(303) 866-3567

REQUEST FOR TECHNICAL REVISION (TR) COVER SHEET

File No.: M-1986061 Site Name: Cugnini Gravel Pit

County_TR# (DRMS Use only) Permittee: Oldcastle SW Group, Inc. dba Four Corners Materials

Operator (If Other than Permittee):

Permittee Representative: Franchesca Mallonee

Please provide a brief description of the proposed revision:

Four Corners Materials is beginning final reclamation of this site. The landowner has requested that a portion (40 acres) of the pit floor be left as an agricultural equipment storage and ranch operations area. This portion as shown on the attached TR map is within what is currently designated as "Irrigated Pasture" lands. This section was used as a stockpiling area and as a hot mix asphalt plant location. The hot plant and associated equipment have been removed from the site. The surface of this area is primarily gravel covered and stable at the proposed reclaimed elevation.

Further, the landowner has stated that he may not have adequate irrigation water to develop sustainable pasture lands over the entire 93.29 acres in the original reclamation plan. Reducing the pasture by 40 acres will serve to meet the needs of the ranch operations and mitigate future water limitations.

As defined by the Minerals Rules, a Technical Revision (TR) is: "a change in the permit or application which does not have more than a minor effect upon the approved or proposed Reclamation or Environmental Protection Plan." The Division is charged with determining if the revision as submitted meets this definition. If the Division determines that the proposed revision is beyond the scope of a TR, the Division may require the submittal of a permit amendment to make the required or desired changes to the permit.

The request for a TR is not considered "filed for review" until the appropriate fee is received by the Division (as listed below by permit type). Please submit the appropriate fee with your request to expedite the review process. After the TR is submitted with the appropriate fee, the Division will determine if it is approvable within 30 days. If the Division requires additional information to approve a TR, you will be notified of specific deficiencies that will need to be addressed. If at the end of the 30 day review period there are still outstanding deficiencies, the Division must deny the TR unless the permittee requests additional time, in writing, to provide the required information.

There is no pre-defined format for the submittal of a TR; however, it is up to the permittee to provide sufficient information to the Division to approve the TR request, including updated mining and reclamation plan maps that accurately depict the changes proposed in the requested TR.

Required Fees for Technical Revision by Permit Type - Please mark the correct fee and submit it with

your request for a Technical Revision.

Permit Type Required TR Fee Submitted (mark only one) 110c, 111, 112 construction materials, and 112 quarries **\$216**

112 hard rock (not DMO) \$175

110d, 112d(1, 2 or 3) \$1006
