**Re: Trapper Mine (Permit No. C1981-010)**  
**Review of June 2023 Discharge Monitoring Reports**

Dear Mr. Roberts:

The Division has received and reviewed the July 2023 Discharge Monitoring Reports (DMRs), including the acute monthly Wet testing results for the Trapper Mine. The DMR's were received electronically by the Division on 24 August 2023. Thank you for your timely submittal of this information. Trapper submits DMRs to the Division, in accordance with Rule 4.05.13(2)(a)(iii).

Trapper reported the following outfalls discharged in July:

- Johnson System Pond #10, NPDS 10
- No Name Pond #5 NPDES 002
- East Pyeatt Pond #2, NPDES 011

Trapper reported that none of the outfalls requiring acute WET testing discharged. Monthly DMRs for discharging outfalls: 001, 002, and 011, indicated that no parameters were exceeded.

The Division does not have any questions, concerns or further comments at this time. If you have any questions or need additional information, please contact me.

Sincerely,

Robin Reilley, M.S. GISP  
Environmental Protection Specialist II
