

Fremont Paving and Redi Mix Technical Revision  
M2016-009  
Pueblo County Aggregate Project  
Narrative Description of Revision

Fremont would like to submit a Technical Revision request to reduce the active mine area to 15 acres. Fremont commits to keeping the active mine area to 15 acres, plus 18.1 acres for the haul road. It is Fremont's understanding, as described in the first response to the recent inspection, that 15 acres will be actively mined following the reclamation of the previous 15 acres. All dirt work and the initial seeding would be accomplished prior to moving to the next 15-acre section. However, full vegetation need not be accomplished prior to moving to the next 15 acres.
