RE: Adequacy Review #1; Technical Revision No. 3 (TR3); 25th Avenue Site – File No. M-2002-020

Bill Schenderlein:

On September 28, 2023, the Division of Reclamation, Mining and Safety (Division) filed your Technical Revision request (TR-3) for the 25th Avenue Site, Permit No. M-2002-020. During review of the material submitted, the Division determined that the following issue(s) of concern need to be adequately addressed before the Technical Revision can be considered for approval. Please provide the following:

1. Per Rule 6.4.5, the Division requires that the City of Greeley provide detailed information regarding the reclamation plan. The plan includes the riverbank stabilization. Therefore, the Division requires that the City provide a basis for the bank stabilization design in TR-03. This should include references to standards, guidelines, and/or other technical publications.
2. Please clarify for the Division if the report by Otak (“Poudre Ponds Bank Stabilization Project”) is meant to be an appendix to the Reclamation Plan (Exhibit E), or does this report represent supplemental information within the TR-3 submittal?

Please submit your response(s) to the above listed issue(s) by Monday, **October 23, 2023**, in order to allow the Division sufficient time for review. If you cannot address the above issues by October 23, 2023, please request an extension to the decision due date in order to ensure adequate time for the Division to review the materials. A decision due date of October 30, 2023 has been set. If any adequacy issues remain by the decision due date the Division may deny your request.

The Division will continue to review your Technical Revision and will contact you if additional information is needed.

If you require additional information, or have questions or concerns, please feel free to contact me at 720-868-7757 or hunter.rildey@state.co.us

Sincerely,
Hunter C. Ridley
