To: "Elliott Russell (DNR-DRMS)" <elliott.russell@state.co.us>, CRAIG PESTER <cprepair72@aol.com>

Elliott,

I wish there was some way that we could work together a little better since I had plenty of time this last week to answer your comments. An hour left today is not a sufficient amount of time to get through them, and am headed out of town on another mining project for three weeks starting Sunday. I was hopeful that we could have Craig's project wrapped up before I left, but now have no choice but to request an extension. I will be back in town on the 20<sup>th</sup> of November so request that we set the new due date as November 27, 2023 which will give me a week to get the comments answered and for Craig to get the changes filed in Cripple Creek.

You told Craig that you had not received the J-1 Exhibits for the adjacent landowner and the newspaper that I sent to both you and Craig on the 10<sup>th</sup>. He said he passed on my copy of the email to him, to you a few minutes ago. I wonder what happened to the one I sent you. I received no notification that it did not go through so request that you answer me back to make sure that my server can talk to yours.

Take care,

Art
