To: "DRMS-Patrick Lennberg (patrick.lennberg@state.co.us)" <patrick.lennberg@state.co.us>

We are going to need additional time to get this technical revision in. Had some significant delays in getting them started but they are on it now.

Julie Mikulas

RE: M-1977-439 Amendment 4, Adequacy Review Item 39

Dear Mr. Lennberg:

In the last adequacy review response prior to approval of Amendment 04, for Comment 39, we agreed to evaluate how Pond E1 and E2 will safely convey the expected 100-year flood event throughout the life of the mine including final reclamation and submit a technical revision to address this issue.

Please accept this letter as our request for an extension from October 30, 2023 to January 15, 2024 to submit the Technical Revision. Anderson Consulting was delayed due to our insurance requirements to be on the property and additional time is also needed to finish the analysis and prepare the evaluation. We may not need this much time but with two holidays coming up we will both have limited staff at times.

Please contact me at 970-407-3631 if any additional information is needed at this time.

Sincerely,

A handwritten signature in cursive script that reads "Julie Mikulas".
