Nahcolite Project, Permit No. M-1983-194, Inspection Problem Abated

Dear Ms. Reck:

On August 28, 2023 the Division of Reclamation, Mining and Safety (Division) conducted an inspection of the above referenced site. Stormwater Management Plan was cited as a problem for having trash and sediment in the stormwater BMPs around the plant. Corrective actions required you clean out/repair BMP features as necessary and submit photo documentation by the corrective action date.

On October 27, 2023 the Division received photos of the repaired BMPs. This satisfies the corrective action and it is considered abated. Please provide the Division with the updated SWMP once completed.

If you require additional information, or have questions or concerns, please feel free to contact me.

Sincerely,

Amy Yeldell
Environmental Protection Specialist
