Re: Correction to Inspection Problem Extension Request Approval, Cortner Pit, Permit File No. M-1986-159

Dear Julie Mikulas,

On November 7, 2023, the Division of Reclamation, Mining and Safety (DRMS/Division) received Martin Marietta Materials, Inc.'s request to extend the deadlines for the following corrective actions for the Cortner Pit, M-1986-159, from the current due date of November 11, 2023 to:

- ❖ November 18, 2023: "Operator shall implement the existing weed control plan and provide photo evidence to the Division."
- ❖ December 11, 2023: "Operator shall submit an Acreage Reduction by the corrective action date."

However, Martin Marietta Materials, Inc. has already submitted the Acreage Reduction required for the inspection problems. The Acreage Reduction (AR2) application was deemed complete on October 12, 2023. At that time, the Division considered this inspection problem: **abated**.

The Division therefore **approves** the extension request for the weed control citation. The new due date for this remaining inspection problem is set for **November 18, 2023**.

If you need additional information or have any questions, please contact me by telephone at (720) 836-0967, or by email at amber.gibson@state.co.us

Sincerely,

Amber M. Gibson
