Thank you for your adequacy review, for which we are preparing a response and expect to have everything to the Division by the close of business on the 9th (tomorrow), except for the signature on the Structures Agreement for County Road 696 from the Board of County Commissioners, which is approved by the Commissioners and committed by Park County to be signed and to us in-hand by the 15th. Is there a way to hand-deliver documents to the Division tomorrow?

MineWater LLC hereby requests an extension of submission and review time through the 17th of November, 2023.
