Re: Resolution Letter, Complaint CT-1, Home Office Mine, Permit No. M-1977-439

Dear Ms. Francher-English:

On June 28, 2023, the Division of Reclamation, Mining and Safety (Division/DRMS) received your complaint regarding the Home Office Mine, permit file no. M-1977-439. The Division reviewed groundwater level data submitted by the Operator and based on that review the Division cited a problem for failure to minimize disturbances to hydrologic balance. The corrective action for the problem citation was for the Operator to install an underdrain along the northern boundary of lined cell adjacent to the field that was the subject of your complaint. On November 3, 2023 the Operator submitted to the Division documentation that the underdrain had been installed and groundwater level data shows groundwater had declined below four feet below ground surface since the drain was installed. The Division considers your complaint resolved.

If you need additional information or have any questions, please contact me by telephone at **303-866-3567 x8114**, or by email at patrick.lennberg@state.co.us.

Sincerely,

Patrick Lennberg
Environmental Protection Specialist
