

Interoffice Memorandum

TO: File

FROM: Dustin Czapla

DATE: November 17, 2023

SUBJECT: M-2021-039, Haynes Excavation Stockpile, Complaint Investigation/Inspection Report

On November 14, 2023 the Division received an anonymous complaint regarding this site. The complaint expressed concerns regarding potential mining at the property without a permit. I inspected the site on November 16, 2023 at approximately 13:00.

The site is located in Montrose County, on the north side of Ranger Road (38.416799°, -107.883940°). The site lies adjacent to the west permit boundary of the South D-20 Pit (M-1992-102).

In 2021 the Division determined that the activity at the site was not mining. This inspection verified that extraction of construction materials is not occurring at the site. Activity at the site appears consistent with the information presented in the “Is it Mining” Questionnaire submitted by Todd Haynes on June 1, 2021.
