Re: Surety Accounting SA-10 update to Technical Revision 115 –Proposing Growth Medium Stockpile Relocation

Dear Mr. Russell:

Newmont – Cripple Creek and Victor Gold Mining Company (CC&V) hereby provides the Division of Reclamation, Mining and Safety (DRMS) Surety Accounting SA-10, Update to Technical Revision (TR)115; Proposing to relocate growth medium stockpiles.

Background:

This work is required to facilitate the expansion of the Schist Island Phase 2B pit while maintaining final reclamation material inventories.

Approximately 20,668 cubic yards of growth medium will be relocated from stockpile GM-01 to stockpile GM-34. See attachment 1 - Location Map.

Stormwater Controls:

Stormwater management for the area will be in accordance with CC&V's Stormwater Management Plan, utilizing best management practices.

Schedule:

Relocation activities will begin immediately, pending approval from DRMS and Teller County Planning Department.

Financial Warranty:

The relocation of growth medium will increase the estimated closure costs by \$6,134. The surplus financial warranty will decrease to \$686,677. There was a slight increase in liability due to a longer haul distance from the stockpiles to the reclamation areas.

Should you require further information please do not hesitate to contact Johnna Gonzalez at 719-313-0447 or johnna.gonzalez@newmont.com , or myself at katie.blake@newmont.com.

Sincerely,

DocuSigned by:

Katie Blake
