**East Douglas Pass, Permit No. M-1987-103, Inspection Problem Abated**

Dear Mr. Doody:

On October 24, 2023 the Division of Reclamation, Mining and Safety (Division) conducted an inspection of the above referenced site. Signs & Markers was cited as a problem for failing to update the mine sign to reflect the current operators name after the succession of operator. Corrective actions required you post a corrected mine site and the permit entrance by the corrective action date.

On December 5, 2023 the Division received photos of the placed boundary markers. This satisfies the corrective action and it is considered abated.

If you require additional information, or have questions or concerns, please feel free to contact me.

Sincerely,

**Amy Yeldell**  
Environmental Protection Specialist
