Hi Emily.

Thank you for getting back to me regarding the groundwater monitoring response. Yes, I will approve a 30-day extension for the response. The new deadline is December 29, 2023.

We're also working with E-470 Public Highway Authority to evaluate the groundwater issues in the area. The Division of Water Resources has requested that we set up a meeting with all parties, once the consultants submit the groundwater reports for each site. I anticipate this meeting will be in January.

Please contact me if you have any questions regarding this, or the corrective actions listed in the last inspection report.

Kind regards,

Nikie Gagnon  
Environmental Protection Specialist

Hello,

Fred Marvel is working on hiring a consultant to review the data and provide all necessary documentation. Could we please get a one month extension?

Thank you,

This email was sent from a source outside of Brannan, please be cautious of links, attachments, and phishing requests.

Hi Emily.

I'm following up on the attached October 26 letter requesting additional groundwater information for Pit 29. The due date in the letter is November 25. Are you working on submitting a response? I can extend the deadline if you need a little more time. Please let me know when you think you'll be submitting the requested information.

Kind regards,

**Nikie Gagnon**
