Re: Trapper Mine (Permit No. C1981-010)
Review of November DMR's 2023

Dear Mr. Roberts:

The Division has received and reviewed the November 2023 Discharge Monitoring Reports (DMRs), including the chronic and acute WET testing results for the Trapper Mine. The DMR's were received electronically by the Division on 18 December 2023. Thank you for your timely submittal of this information. Trapper submits DMRs to the Division, in accordance with Rule 4.05.13(2)(a)(iii).

Trapper reported the following outfalls discharged in November.

- Johnson System Pond #10, NPDS 001
- No Name Pond #5 NPDES 002
- East Pyeatt #2 NPDES 011
- Middle Flume NPDES 020

Trapper reported that none of the outfalls requiring WET testing discharged. Monthly DMRs for discharging outfall indicated that no parameters were exceeded.

The Division does not have any questions, concerns, or further comments at this time. If you have any questions or need additional information, please contact me.

Sincerely,

Robin Reilley, M.S. GISP
Environmental Protection Specialist II
Robin.reilley@state.co.us
