**Whitewater Pit 500, Permit No. M-1977-129, Inspection Problem Abated**

Dear Mr. Gardner:

On May 9, 2023 the Division of Reclamation, Mining and Safety (Division) conducted an inspection of the above referenced site. Several problems were cited related to an outdated mining and reclamation plan. Corrective actions required you update the Mining and Reclamation plans to fit the current operation by the corrective action date.

On October 30, 2023 the Division approved TR-6. This satisfies the corrective action and it is considered abated.

If you require additional information, or have questions or concerns, please feel free to contact me.

Sincerely,

**Amy Yeldell**  
Environmental Protection Specialist

EC: Travis Marshall, Senior EPS, DRMS
