RE: White River Pit, Permit No. M-2008-070, Inspection Problem Abated

Dear Mr. Grounds:

On November 30, 2023 the Division of Reclamation, Mining and Safety (Division) conducted an inspection of the above referenced site. Signs & Markers was cited as a problem for not having displayed a mine sign. Availability of Records was also cited as a problem for not having up to date contact information on file with the Division. Corrective actions required you place mine sign at the entrance to the mine site and provide photo documentation of such. And to update the contact information via the ePermit system by the corrective action date.

On January 10, 2024 the Division received documentation that both items have been sufficiently addressed. This satisfies the corrective action and it is considered abated.

If you require additional information, or have questions or concerns, please feel free to contact me.

Sincerely,

Amy Yeldell
Environmental Protection Specialist

EC: Travis Marshall, Senior EPS, DRMS
