N, W, S portions of project site completed.	4-5 acres
Will need to return to finish East side	

Water Use Log

Start Reading	End Reading	Amount (gal.)	Pump Location # (if applicable)

Notes/Comments:

Targeted moderate to dense populations of Canada Thistle throughout site. Populations most dense on South and East portions. Also treated sporadic occurrences of Musk thistle.

Noxious Weed/Invasive Plant Treatment Record

A record sheet should be filled out for each noxious weed treatment including biocontrol releases, herbicide application, mechanical/manual actions directly targeted at a particular weed species. Fill in as many blanks in the record sheet as are applicable to the treatment performed. The location of treatment should be marked on an attached map. A copy of this record should be retained for a minimum of 3 years. Photos of form acceptable.
