

Memorandum

To: Lamb Lakes, M-2018-039, North Weld County Water District
Permit File
From: Bill Schenderlein
Date: January 22, 2024
Subject: Supplemental Information – Affected Area

For Annual Report Item Number 8, the number of acres currently affected was changed from 79.0 acres to 128.8 acres.

This is only a reporting correction and no additional physical area of disturbance was added during the 2023 reporting period. The 79.0 acres previously reported only accounts for the area requiring additional reclamation. However, the entire permit area (128.8 acres) contains “incomplete and/or unreleased reclamation” and remains “affected area”.
