**Re: Warren Gravel Pit, Permit M-2012-024,  
Corrective Action Extension (well permit and water rights documentation)**

Dear Mr. Gardner:

During my inspection in October 2022, I identified problems that require corrective actions. Regarding the need for documentation related to a well permit and water rights, I am extending the decision due date to April 15, 2024. This is to allow more time for you to secure a contract with the Bureau of Reclamation (BOR).

I understand that this has been a lengthy process to get the BOR to sign the contract. To avoid a violation with my division, do not expose groundwater at this site until that contract has been signed and you have provided my division with proof that the Colorado Division of Water Resources is allowing your operation to expose groundwater.

If you have any questions, please contact me at [Rob.Zuber@state.co.us](mailto:Rob.Zuber@state.co.us) or by calling (720) 601-2276.

Thank you,

Robert D. Zuber, P.E.  
Environmental Protection Specialist
