**Proposed Structure Agreement Substitute**

**RE:** Yankee Gulch Minerals Project, File No. M-1999-002 , SO-2 Structure Agreements

Russ,

Yankee Gulch Minerals Project (M-1999-002) is in the process of transferring the permit from Solvay back to American Soda. As you know this site is several thousand acres amongst heavy energy development with a large number of structures. The site is in final reclamation and no additional work should be required prior to release.

What I propose is for the Operator to submit to the Division a notarized document stating that "no additional disturbances within the affected land of any kind will occur within 200 feet of a structure without first submitting to the Division a completed Structure Agreement(s) or a Geo-Tech Evaluation."

This will allow for the completion of the SO-2.

Sincerely,

**Amy Yeldell**  
Environmental Protection Specialist
