To: Graham Roberts <graham.roberts@trappermine.com>, Robin Reilley - DNR <robin.reilley@state.co.us>

Good Morning Mr. Roberts,

Please find the Divisions' Review of the December 2023 and quarter 4 DMRs for Trapper Mine. The DMR report included WET testing results. No concerns were noted.

Thank you

Re: Trapper Mine (Permit No. C1981-010)
Review of December DMR's 2023

Dear Mr. Roberts:

The Division has received and reviewed the December 2023 and the quarterly (Q4), Discharge Monitoring Reports (DMRs), including the chronic and acute WET testing results for the Trapper Mine. The DMRs were received electronically by the Division on 29 January 2024. Thank you for your timely submittal of this information. Trapper submits DMRs to the Division, in accordance with Rule 4.05.13(2)(a)(iii).

Trapper reported the following outfalls discharged in December.

- Johnson System Pond #10, NPDS 001
- No Name Pond #5 NPDES 002
- East Pyeatt #2 NPDES 011
- Middle Flume NPDES 020

Trapper reported that none of the outfalls requiring WET testing discharged. Monthly DMRs for discharging outfalls indicated that no parameters were exceeded.

The Division does not have any questions, concerns, or further comments at this time. If you have any questions or need additional information, please contact me.

Sincerely,

Robin Reilley, M.S. GISP
Environmental Protection Specialist II
