Dear Amber,

RE: Tamrock Gravel, LLC. Shot Rock Pit - M-2012-023 Corrective action Boundary Markers

On behalf of my client Tamrock Gravel LLC, I am providing the following information to address the December 8, 2023 Inspection report Signs & Marker inspection topic.

Your inspection report states that "the affected area boundary markers are missing or incorrectly placed". For the first time in about 3 weeks due to weather, Mr. Tamburelli's was able to access the site and spent most of the day checking the permit corner locations along the southern permit line. He found only one missing corner post and placed white pipe over each marker and took pictures. He was able to find them using the locations shown on the attached **Corners Map**. In the approved permit the Permit Boundary and Affected Lands are one and the same and the setbacks were explained to be mining setbacks, not potentially undisturbed areas.

It is based on data collected when the original layout of the mine was done in 2012, where I recorded the Latitude/Longitude coordinates for each corner when we set them. I labeled the corners you were able to find at the inspection based on the letters on your **Map 1** (page 18 of 19) and then started using numbers to designate the ones Brent found. The corners you found are shown as black text and the ones you did not find are red. Corner 1 was the only missing marker that needed to be reset.

The attached Photo pages show each of the 7 unidentified corners and Corner 4 which is your "F". It appears from what

Brent found when locating the corners and photos that the western red area shown on Map 1, from corner 6 to 7, is all in the permit area. The eastern area is greatly reduced or may well be in the affected land/permit boundary as well. I believe this is due to the inherent inaccuracies of Google Earth. The data you collected at the inspection may shed some light on that area and may become an important part of the scheduled hearing.

If you have more questions or need more information please call me at (303) 423-7297.

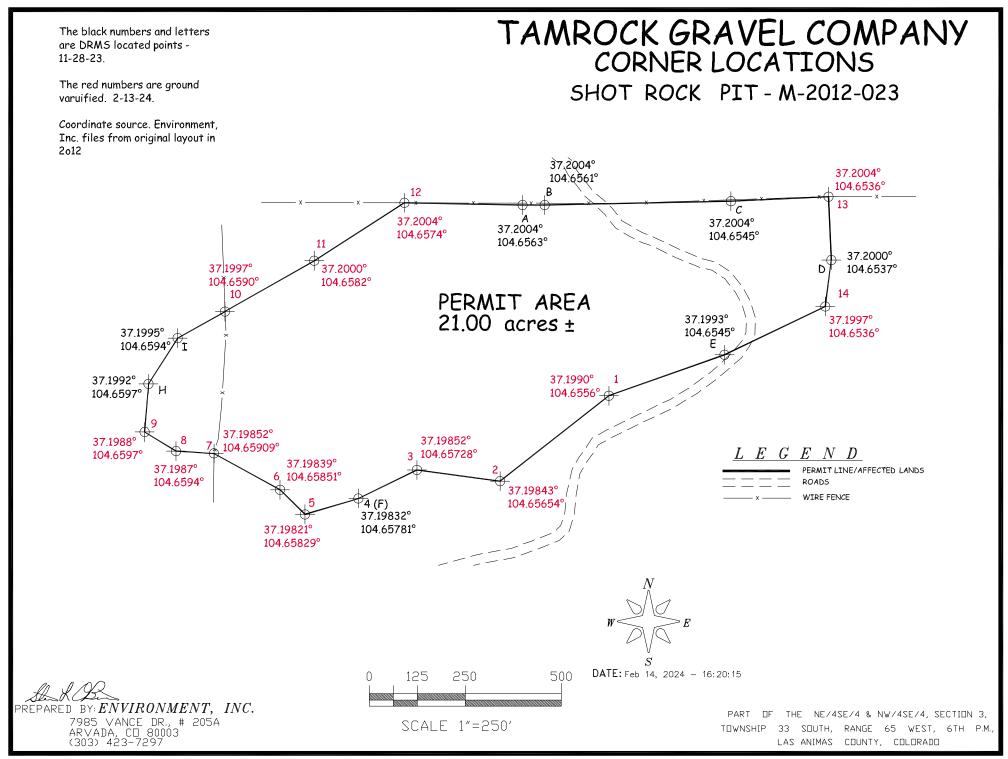

Sincerely,

Stove
