Re: Piceance Pit - File No. M-2001-077 IHC Scott, Inc. Surety Increase (SI-1) Post inspection surety increase

Dear Chris Hurley:

On March 4, 2024 the Division of Reclamation, Mining and Safety increased the current Financial Warranty for this permit to \$208,299.00, in accordance with Rule 4.2.1 of the Rules and Regulations. This is an increase of \$167,891.00.

Please see the November 30, 2023 inspection report for details regarding why this surety increase is required.

The Division ordered amendment of the current Financial Warranty, or submittal of a new Financial Warranty reflecting the increase, within 60 days from the date of this letter (March 4, 2024).

Please make arrangements with Sara M. Stevenson-Benn at the Division's Denver office for submittal of the financial warranty. Any other questions regarding completion, execution and/or submittal of financial warranty forms should also be directed to Sara M. Stevenson-Benn by telephone at (303) 866-3567 (8148), or by email at Sara.stevenson-benn@state.co.us.

The Permittee for this site may be scheduled for a Formal Board Hearing for possible revocation of the permit after May 3, 2024, if the amount of any increased Financial Warranty has not been provided.

RE: Piceance Pit, Permit No. M-2001-077, Reclamation Cost Estimate

Dear Mr. Hurley:

This reclamation cost updated was in response to the site inspection conducted on November 30, 2023. It is Division policy to periodically update its costs to ensure that the Financial Warranty adequately, reflects the actual current cost of fulfilling the requirements of the approved reclamation plan.

The bond was last recalculated in 2022 with SO-4. Significant activity has occurred on site since the previous calculation. Below is a table summarizing input values. This table does not account for price changes resulting from inflation or other RS Means cost changes. Bond calculations are based on a combination of field observations and worst case scenario based on the approved reclamation plan.

Assumptions:

- Site is 34.13 ac w/ 4.5 ac undisturbed. Pit/pond footprint is 12 ac
- All slopes go to a 3H: 1V or less

Task	Form Used	Description		
01a	Demo	Remove Scale footers 70' x 15'		
02a	Pumping	Dewater 12 ac pond approx. 10 ft prior to grading

04a	Grader	Decompact pit stockpile areas 17.63 ac		

Task	Form Used	Description
05a	Scraper	Spread topsoil 8" over 17.63 ac = 18,962 CCY Avg distance 1500 LF away 34.13ac - 12 ac pond- 4.5ac undisturbed = 17.63 ac
06a	Reveg	Reveg all areas where Topsoil was applied Riparian Mix – 3,100 LF perimeter of pond x 20ft (partially above and below water) total of 1.42 ac
06b	Reveg	Upland Mix – (17.63 ac topsoiled–1. 24 ac wetland) 16.21 ac (stockpile area and perimeter berms)
10a	Mob	Initial Mobilization
10b	Mob	Secondary Mobilization
Indirect		DRMS Standard Overhead Costs: Liability insurance, performance bond, profit, administration, Legal, Engineering and Project Management

Per policy I wanted to send this out for review prior to issuance. Please look it over and let me know if there are errors or concerns. If no response is received by <u>Monday, February 12, 2024</u> then I'll issue SI-1 as is. SI-1 will result in a total required bond amount of **\$208,299**, which is an increase of **\$167,891** over the \$40,408.00 currently held.

Please feel free to contact me with any further questions. Amy Yeldell at the Division of Reclamation, Mining and Safety, Rm 215, 1001 E 62nd Ave, Denver CO 80216. Direct contact can be made by phone at 303-866-3567 Ext 8183 or via email at amy.yeldell@ state.co.us
