RE: Preliminary Adequacy Review; Technical Revision (TR-1) – Request to Discontinue Groundwater Monitoring at the Site; Timnath Pit, Permit No. M-1989-056

Dear Mr. Havens,

On February 28, 2024, the Division of Reclamation, Mining and Safety (Division/DRMS) received your request for Technical Revision 1 (TR-1) to stop groundwater monitoring at the Timnath Pit, Permit No. M-1989-056. The following clarification(s) or items need to be addressed to the Division's satisfaction.

1. A review of DWR records does not indicate a piezometer was installed or abandoned near or around the Weiderspoon monitoring point. A review of the Larimer County Assessor site shows the property where the piezometer may have been installed is either owned by the Operator/Permittee or the former Operator/Permittee Don Kehn. The Operator needs to determine the status of this monitoring point along with photos. If the monitoring point exists it will need to be plugged and abandoned according the State Statutes.

This concludes the Division's adequacy review of your application. The Division reserves the right to further supplement this document with additional adequacy items and/or details as necessary.

The decision date for your application is set for **March 29, 2024**. If additional time is needed to respond, an extension request must be received by our Office by the decision date. If on the decision date, outstanding adequacy items remain, and no extension request has been received, your revision may be denied and the file terminated.

If you need additional information or have any questions, please contact me by email at patrick.lennberg@state.co.us.

Sincerely,

A handwritten signature in blue ink, appearing to read "Patrick Lennberg". The signature is fluid and cursive, with the first name "Patrick" and the last name "Lennberg" clearly distinguishable.

Patrick Lennberg
