**RE: Table Mountain Quarry (M-1999-004), Technical Revision 3 (TR-3), Reclamation of Solar Panel Array/Ancillary Equipment**

Wyatt Webster,

On March 26, 2024 the Division of Reclamation, Mining and Safety (Division) filed your Technical Revision request (TR-3) for the Table Mountain Quarry, Permit No. M-1999-004. During review of the material submitted, the Division determined that the following issue(s) of concern need to be adequately addressed before the Technical Revision can be considered for approval. Please provide the following:

1. For the purposes of bonding, please provide the Division with an estimate for approximately how long demolition and disposal of the solar panel array and ancillary equipment will take. Please provide this estimate using a unit of hours.
2. The Division will calculate a reclamation bond cost estimate based on the responses to this adequacy letter and will then reevaluate the cost estimate provided to Holcim with the inspection report dated November 9, 2023. You will be provided a copy of that reclamation cost estimate for review before the decision due date. *No further response needed.*

Please submit your response(s) to the above listed issue(s) by **April 15, 2024**, in order to allow the Division sufficient time for review. If you cannot address the above issues by such date, please request an extension to the decision due date in order to ensure adequate time for the Division to review the materials. A decision due date of April 25, 2024 has been set. If any adequacy issues remain by the decision due date the Division may deny your request.

The Division will continue to review your Technical Revision and will contact you if additional information is needed.

If you require additional information, or have questions or concerns, please feel free to contact me at 720-868-7757 or [hunter.ridley@state.co.us](mailto:hunter.ridley@state.co.us)

Sincerely,

Hunter C. Ridley
