RE: Wattenberg Lakes (M-2004-051)
Ground Water Monitoring - Technical Revision Request

Mr. Bowles,

Holcim – WCR, Inc. is requesting a Technical Revision to the current groundwater monitoring plan at Wattenberg Lakes to remove Monitoring Well 4 (MW-4) from further monthly monitoring and annual reporting requirements. Following completion of the slurry wall in 2016 for Pond 3, the month to month deviation has remained within three feet and steady (variable due to typical seasonal flow). MW-4 is currently located within the proposed spillway and will be removed due to construction activities. Holcim is proposing to remove the monitoring requirements and will continue monitoring the remaining wells until completion of reclamation.

Please contact me at 702-379-4623 with any questions and if you would like to have an in-person meeting.

Sincerely,

A handwritten signature in black ink, appearing to read 'Wyatt R. Webster', written over a horizontal line.
