

Memorandum

To: Brock Bowles, DRMS
From: Rob Zuber, DRMS
Cc: Jared Ebert, Amy Eschberger
Date: April 10, 2024
Subject: TR-02 adequacy review for Brandstadt Rock Pit, File No. M-1986-004

I am requesting your assistance in reviewing the applicant's adequacy response for TR-02. In my adequacy letter (dated January 2, 2024), I told the applicant to provide data illustrating that the soils on the Brandstadt Rock Pit are very poor and growing vegetation on this site is not practical.

Please look at the applicant's soil sampling approach to determine if it meets the parameters outlined in my January adequacy letter. Also, please review the soils data and photographs of the site to assess the potential for growing reclamation species.

I am sending you, via email, the adequacy letter from January as well as the applicant's response from yesterday.

Let me know if you have questions, and thanks for your help.
