Upland Gravel, Permit No. M-2001-088, Inspection Problem Abated

Dear Mr. Rinderle:

On July 5, 2023 the Division of Reclamation, Mining and Safety (Division) conducted an inspection of the above referenced site. Compliance with Mine Plan was cited as a problem for having more land unreclaimed than specified in the permit. Corrective actions required you update Reclamation Plan by the corrective action date.

On April 22, 2024 the Division approved TR-1 which updated the Reclamation Plan to up to 20 acres unreclaimed at any given time.. This satisfies the corrective action and it is considered abated.

If you require additional information, or have questions or concerns, please feel free to contact me.

Sincerely,

Amy Yeldell
Environmental Protection Specialist

EC: Travis Marshall, Senior EPS, DRMS
