

Permittee Name: Daniel J & Barbra J. Gaudreault
Permit No: M-2006-081
Operation Name: Big G Gravel Pit
Anniversary Date: 04/24/2024

SUPPLEMENTAL INFORMATION (as of 4/23/2024)

8. We obtained a current air photo for 2023 and have corrected the total disturbed area to match what is actually on the mine site
9. No new area was mined this year all material removed was within the disturbed area or from the Plant Site stockpiles.
14. The Tamarisk in the mined area were mechanically removed this year in the fall and the site will be monitored and control will continue as needed.
15. There are approximately 25,000 YD³ of growth medium stored on the mine site at this time. This is more than enough to cover the disturbed areas on site with the 6 inches required by the permit.
19. The mine was inspected on 2/28/2023 and the bond was increased to reflect current cost to reclaim the disturbed area
