RE: Transmittal of Adequacy Review #1 Response Pages for Holcim-WCR, Inc., Wattenberg Lakes Mine, File No. M-2004-051, 112c Permit Amendment Application

Dear Mr. Bowles:

This letter is provided as a transmittal for the revised exhibit pages prepared in response to the DRMS Adequacy Review #1 letter, dated August 8, 2023, regarding Holcim's 112c Permit Application for the Wattenberg Lakes Mine (File No. M-2004-051). Comments from Colorado Parks and Wildlife (CPW), the Division of Water Resources (DWR), the City of Aurora, and Mr. Carl Eiberger were also provided at that time and the applicable topics raised in these letters were also addressed in the revised exhibit pages.

As you directed in your Adequacy Review #1 letter, we are responding to the comments via the preferred method that involves incorporating our responses into the text of the appropriate exhibit. This transmittal provides the updated permit pages to DRMS for review. All revised exhibit pages are also being provided to the Weld County Clerk and Recorder.

Thank you for your consideration. If you have any questions or need additional information, please let me know.

Sincerely,

TETRA TECH
