To: DRMS, our other two claims (Three and Four Point), were approved on the June 8<sup>th</sup> 2023 by the Colorado DRMS and USDA Forest Service and converted to Mining Permit Number M-2023-002.

The other four claims for this Permit No. P-2015-008 have been maintained during the season (prospecting, checking post's, signs and checking for holes, and trash etc.). We are doing further checks this season to see if there are other holes that need covered (from other persons illegal digging) so that we can proceed with the release of our bond and to determine which areas we would like to convert to a 110(1) hard rock mining permit.

Thank you. Sincerely! George L. Quist
